## Remarks to samples:

**P 1163 Conversion of protein to soy : 76,52%**

**Vit D2 (ergokalciferol) = 0,0022 mg/100g = 88 U.I./100g**

**Remark:** Uncertainty  $n = \pm \%$  of the result (uncertainty extension  $k=2$ , corresponding to a reliability level of about 95%)

- sampling uncertainty not included

- values marked \* mean absolute uncertainty in units of the result

Unless otherwise stated, the results are based on the original mass of the sample.
